

## Skype: Making A Call

First, log into Skype (see the “Skype: Logging In” tutorial if you do not know how to do that). Then, click on the person in your contacts list you would like to make your call to. In my case, I am making a call to my teacher.

Then, click “Video Call” or “Call” depending on how you would like to communicate (I am showing you a Video Call. If you would like to send them an instant message, you can type it into the box at the bottom of the page.

You will see your image in the bottom right corner and the person you are calling's image in the center. To see your messages or send an instant message. Click on the chat icon in the bottom left corner. To add someone to your call, click on the plus icon in the center. To end the call, click on the red telephone icon directly to the right of the plus icon.

**Congratulations! You have made a Skype call! 😊**
